Compendium of undergraduate studies in „International Management“

This programme has been preliminarily re-accredited by AQAS e.V. Germany.
„International Management“, one of our undergraduate courses of study, finalizes with the academic degree “Bachelor of Arts” after six semesters.

The course of studies has a consistently international bias. After the provision with basics in economics marketing and management in an international context are on the schedule in the second section of studies. An internship or studies for one term (at any of our partner universities) in a foreign country are an obligatory part of the programme. Two semesters will be taught in English as integral part of this degree course. Moreover, learning a second foreign language will be obligatory for the students, too.

**Objective and main idea**

This programme is a response to the constantly growing demand on the labour market. Not only on the European domestic market, but also on the global markets even small and medium-sized businesses operate on international sales and buying markets. It is evident that enterprises will more and more prospect for the described segment of education concerning jobs in management and marketing.

There is a demand for development of leadership skills especially for international business segments. The graduates of „International Management“ should be able to accomplish management tasks successfully and thereby, they should especially

- be able to prepare and take decisions in enterprises
- detect and deploy chances on international markets
- lead employees, coordinate creative solutions to problems and they should not only be able to work in teams, but also act sophisticatedly in the communication with others

by virtue of their methodical knowledge and their soft skills.

The graduates are supposed to stand out due to their analytical comprehension and abilities to abstract. Their expertise enables them to think in international contexts and to unlock to new sources of know-how. In an international environment self-confidence should feature them.

During the first term we teach the so-called „self-competencies“ like attitude to work and work techniques, self-management and ability to learn by oneself via a specific module. Practicing social core values like ability to communicate or to work in teams is also planned for a later period during the studies. We achieve this by tackling with problems out of professional life in lecture components that are taught as complementaries to obligatory modules. We especially point out team work and techniques in presenting and giving speeches by means of projects in this course of studies.

„International Management“ fosters an adequate preparation for our students to attain the competencies that are expected in international enterprises. Comprehensive knowledge of languages is seen as a self-evident pre-condition to a successful course of studies in this subject. Moreover, the graduates are featured with competitive advantages due to a persistent and forceful orientation at practical
experience during their studies. Thus, our offer for that course of study is strongly orientated at the persistent demand that businesses and entrepreneurial organizations make where graduated final degrees are concerned.

### The Curriculum

Students can attain 30 credits per term. Therefore, they can obtain 180 credit points in six semesters.

With respect to the basic subjects lectures, tutorials and practical exercises are provided in equal proportions to the students. Practical projects and case studies will be preferred in the second part of the scholastics in order to meet the constantly growing need for competencies in decision making and in solving. This means in particular that students should find their own way to come to the solutions. This requires effective teamwork and an creative way of thinking as well.

Basic modules are taught in German in the first three semesters. The advanced study period starts in Semester four with one term taught in English. Main subjects in those modules are economics, marketing and management in an international context. The subsequent courses are held as lectures en block whereas the content is consistently internationally orientated again. The fourth semester is recommended to receive exchange students from our international partner universities. In the fifth semester students International Management at Bocholt campus must study at least one semester abroad. The sixth term starts with an internship abroad, which is supposed to last at least 12 weeks. Finally a thesis has to be accomplished.

**Objectives and trained competencies:**

- Students will get a basic understanding of:
  - characteristics of leadership and management,
  - theory and tools on strategic planning,
  - international impacts on management,
  - challenges of intercultural collaboration
  - process of operative planning of sales, capacity, financial and human resources in international context
- Students will be trained how to apply planning tools and take risc for their decisions
- Soft skills
  - The students are able to deliver a written paper on academic level and a presentation in English on a professional level.
  - They are able to cope with some effects of culture clash in work situations.

**Contents:**

- Models to explain intercultural differences, how to manage intercultural collaboration,
- cross-cultural team building,
- practise in Cultural impacts on global management (external lecturer)
- Challenges, objectives and basic functions of international management
- Environmental analysis
- Theories and tools for strategic planning
- Organizational development and organizational control
- Application of management skills and planning tools by using a business simulation software

**Forms of teaching:**

- Seminars, case studies, practice tasks based on a business simulation

**Prerequisites:**

- none

**Possible forms of examination:**

- Presentation, paper, written exam

**Requirements for grade assignment:**

- Passed exams

**Weight of grade:**

- 10/169

**Responsible professor and lecturers:**

- Prof. Dr. Figura, Prof. Dr. Hansen

**Complimentary information:**

- All instructions and exams will belong to English language

**Literature:**
